In projects I offer deep technical knowledge and a passion for user experience. In the workplace I offer a focus on processes and people. In projects I look for clarity and correctness. In workplaces I look for stability and honesty.

## Work Experience

### Ruckify

Contract Web Development February, 2021–June, 2021  
Angular, HTML, CSS, JavaScript, PHP Vancouver, BC

- Helped upgrade website to a more maintainable, mobile friendly, readable and accessible website style by updating fonts, colours, buttons and widgets to the new style guide using ANGULAR, web components and PHP templates.
- Made mobile friendly footer HTML and CSS.
- Coordinated work with pull requests with GITLAB, DEVDOCS and SLACK.

### Global Village English Marketing

Marketing Technician May, 2015–December, 2020  
PHP, SQL, HTML, CSS Vancouver, BC

- Optimized website for small devices and slow international clients from yellow to green on Google Pagespeed Insights.
- In a team, used HTML, CSS and JavaScript for a PHP backend plan and redesigned the gvenglish.com website for small iPhone device sizes and a faster load speed for international students.
- Spedup website, debug and correct bespoke MariaDB SQL server configuration issues and performance problems
- Transitioned Windows email server and LAMP server to a more reliable and maintainable HTTPS configuration with CertBot and LetsEncrypt away from expensive long term certificates.
- Tracked down potential security issues, scrape and filter server logs and application CSV files with Python.
- Coordinated and plan issues and long-term goals using the Mojohelpdesk ticketing system and the teamwork.com project tracking web applications.
- Reworked a legacy XSLT templating system to use Webpack and Handlebars.

## Education

### Langara College

Associates of Science Degree in Computer Science - 2017  
User Interfaces, OOP, JAVA, C

- LINUX scripting and administration
- Web application design and development

## Hobbies

## Key Skills and Proficiencies
